💡 **What makes this different?** Unlike generic AI chatbots, your coach reads your actual VIE Market data — weekly sales, margins, labour costs, member activity, and stock levels — before every answer. Every recommendation is based on YOUR numbers.

## How to Use Your AI Coach

3 simple steps — no setup required

### 1 Click the ✨ sparkle button

Look for the floating olive-green button in the **bottom-right corner** of any dashboard page. It pulses gently to remind you it's there. Click it to open the AI Coach panel.

### 2 Pick a category or ask anything

Choose from **5 colour-coded category pills** (Labour, Margins, Members, Stock, Game Plan) to browse 10 pre-written questions each. Or just type your own question in the input bar.

### 3 Get data-driven answers instantly

The coach analyses your **last 4 weeks of data** and responds with specific numbers, trends, and actionable recommendations. Responses use bold highlights, bullet points, and clear next steps.

## The 5 Question Categories

50 expert-crafted questions aligned with your Business Improvement Plan

### Labour & Scheduling

HIGHEST IMPACT

**Why it matters:** Labour is your #1 profit lever. Costs grew +37% while sales only grew +7%. Target: get labour % back below 24%. Estimated saving: **$5K–$8K per month**.

1. What's my labour cost % this week vs the 24% target?
2. Which days this week had labour % above 30%? What went wrong?
3. Compare weekend vs weekday labour efficiency — where am I overstaffed?
4. What's the optimal teen vs adult staff split to minimise costs this weekend?
5. Show me labour cost per transaction for each day this week — any outliers?
6. If I cut 4 hours on my slowest weekday, how much would I save monthly?
7. Which shifts are costing me the most relative to revenue generated?
8. Build me a recommended staffing plan for next week based on recent patterns
9. Am I spending more on Sunday penalty rates than the extra revenue justifies?
10. What's my month-over-month labour trend? Am I improving or getting worse?

## Margins & Profitability

PROFIT DRIVER

**Why it matters:** Average sale value declined 10% from $24.64 to $22.19. Real profit margin at 23.8%, target ≥25%. Every **$1 improvement = +$6,800/month** in pure margin.

1. What's driving my average sale value down? Break it down by factor
2. Which categories delivered the highest margin this week and why?
3. My real profit margin target is 25% — where do I stand and what's the gap?
4. Cafe mix is growing — is the extra margin covering the extra labour cost?
5. Show me gross vs net spread — are discounts eating into my profits?
6. What would happen to monthly profit if I lifted avg sale by $1?
7. Rank my bottom 5 margin categories — should I drop any of them?
8. Which categories above 42% margin should I give more shelf space to?
9. Compare this week's real profit per transaction vs last month's average
10. Set me 3 specific margin goals for next week with action steps

## Members & Loyalty

GROWTH ENGINE

**Why it matters:** Members spend more per visit and return more often. Target: increase member revenue share by +5%. Identify at-risk members before they churn and run targeted re-engagement.

1. How many members are at risk of churning this week? What should I do?
2. What % of my revenue comes from members vs walk-ins? Is it improving?
3. Which members went from Active to Cooling this week? How do I bring them back?
4. What's the avg spend difference between members and non-members?
5. Give me a loyalty campaign idea for this week based on current member data
6. How many new members signed up this week vs last week?
7. Which day of the week has the most new member sign-ups?
8. What points redemption patterns am I seeing? Are members engaged?
9. Identify my top 10 highest-spending members — are any cooling down?
10. What should my member re-engagement SMS say this week based on the data?

## Stock & Inventory

CAPITAL RELEASE

**Why it matters:** Dead stock ties up cash. Clear slow-movers (>90 days stock) and push high-margin products daily. Potential capital release: **$5K–$15K** back into cash flow.

1. Which products should I run a clearance promotion on this week?
2. Show me high-margin products that are underselling — I'll push these today
3. What categories have dead stock sitting over 90 days? Time to act
4. Give me a daily sales goal: which 3 products should I actively promote today?
5. Which categories are declining in sales and what could be causing it?
6. How many 'Needs Action' inventory alerts do I have? Are they improving?
7. What high-margin product could I bundle with a café item for an upsell?
8. Compare Tea, Gifts, and Fermented Goods performance — my best margin categories
9. How much capital is tied up in slow-moving stock? What should I clear first?
10. Suggest a weekly promotion plan based on my highest-margin, lowest-selling items

## Weekly Game Plan & Goals

ACCOUNTABILITY

**Why it matters:** Consistent weekly reviews catch problems early. Use the Monday briefing to set goals, the mid-week check to course-correct, and the weekly score to track progress toward your KPI targets.

1. Give me my Monday morning briefing — how did last week go and what to focus on?
2. Score my week: rate labour, margins, members, and stock out of 10
3. What are the 3 most important things I should fix this week?
4. Set me SMART goals for this week across all key metrics
5. What does a good week look like for VIE? Define it in numbers
6. Compare this week to my best week ever — what's different?
7. Am I on track for my monthly targets? What needs to change?
8. What's one quick win I can implement today to improve profitability?
9. Predict my monthly outcome based on current trends — any red flags?
10. Build me a daily checklist for optimising VIE this week

## Pro Tips

Get the most out of your AI Coach

**Monday Ritual:** Start every Monday by asking *"Give me my Monday morning briefing"*. This gives you a complete review of last week + focused priorities for this week. Takes 30 seconds.

**Daily Wins:** Each morning, ask *"Give me a daily sales goal: which 3 products should I actively promote today?"*. Share this with your team — it creates a mini-mission for the day.

**Follow-Up Questions:** The coach remembers your conversation. After getting a recommendation, ask *"How exactly would I implement that?"* or *"Give me the step-by-step."*

**Weekly Score:** Every Friday, ask *"Score my week out of 10"*. Track this number week over week — it's your business fitness score. Aim for consistent 7+ across all categories.

## Your KPI Targets

The coach will hold you accountable to these numbers

| Metric | Current | Target | Timeline |
|---|---|---|---|
| Labour vs Sales % | 28% ↑ | ≤ 24% | 4 weeks |
| Average Sale | $22.19 ↓ | ≥ $24.00 | 8 weeks |
| Real Profit Margin | 23.8% | ≥ 25% | 3 months |
| Member Revenue % | TBD | +5% | 3 months |
| Dead/Overstock Items | TBD | −30% | 6 weeks |
